

Strong Artificial Intelligence

B Intelligence

Artificial Intelligence, Strong Artificial Intelligence

Prof. Dr. Dr. h. c. Robert Grebner

Technical University of Applied Sciences, Würzburg, 20.03.2026

Workshop „Intelligence“

1. What is intelligence? Try to give an definition.
2. What is needed to be intelligent?
3. Give examples of „weak“ intelligence.
4. Give examples of „strong“ intelligence.
5. Do you need to know the concept of intelligence to be intelligent?
6. What is thinking? Try to give an definition.
7. How is intelligence and thinking connected together?

B Intelligence

1. Definition

What is Intelligence?

2. Artificial

What is Artificial?

3. Interaction

No Interaction, no Intelligence!

4. Learning

No Learning, no Intelligence!

5. Thinking

No Thinking, no Intelligence!

6. Maturity

Already strong or general or not?

7. *Conclusion*

What to do?

1. Definition

What is Intelligence?

Intelligenz, die **DUDEN**
Substantiv, feminin
Fähigkeit [des Menschen], **abstrakt** und **vernünftig** zu **denken** und daraus **zweckvolles Handeln** abzuleiten
Ability [of human beings], to **think abstract** as well as **reasonable** and derive **purposeful acting** out of that

Can we Promote Intelligence?

Yes.

Can we Build Machines as
Intelligent as we are?

?

1. Definition

Intelligenz, die

Substantiv, feminin

Fähigkeit [des Menschen], **abstrakt** und **vernünftig** zu **denken** und daraus **zweckvolles Handeln** abzuleiten

Ability [of human beings], to **think abstract** as well as **reasonable** and derive **purposeful acting** out of that

DUDEN

2. Artificial

Natural Intelligence
biological world

Artificial Intelligence
digital world

spirit

mind

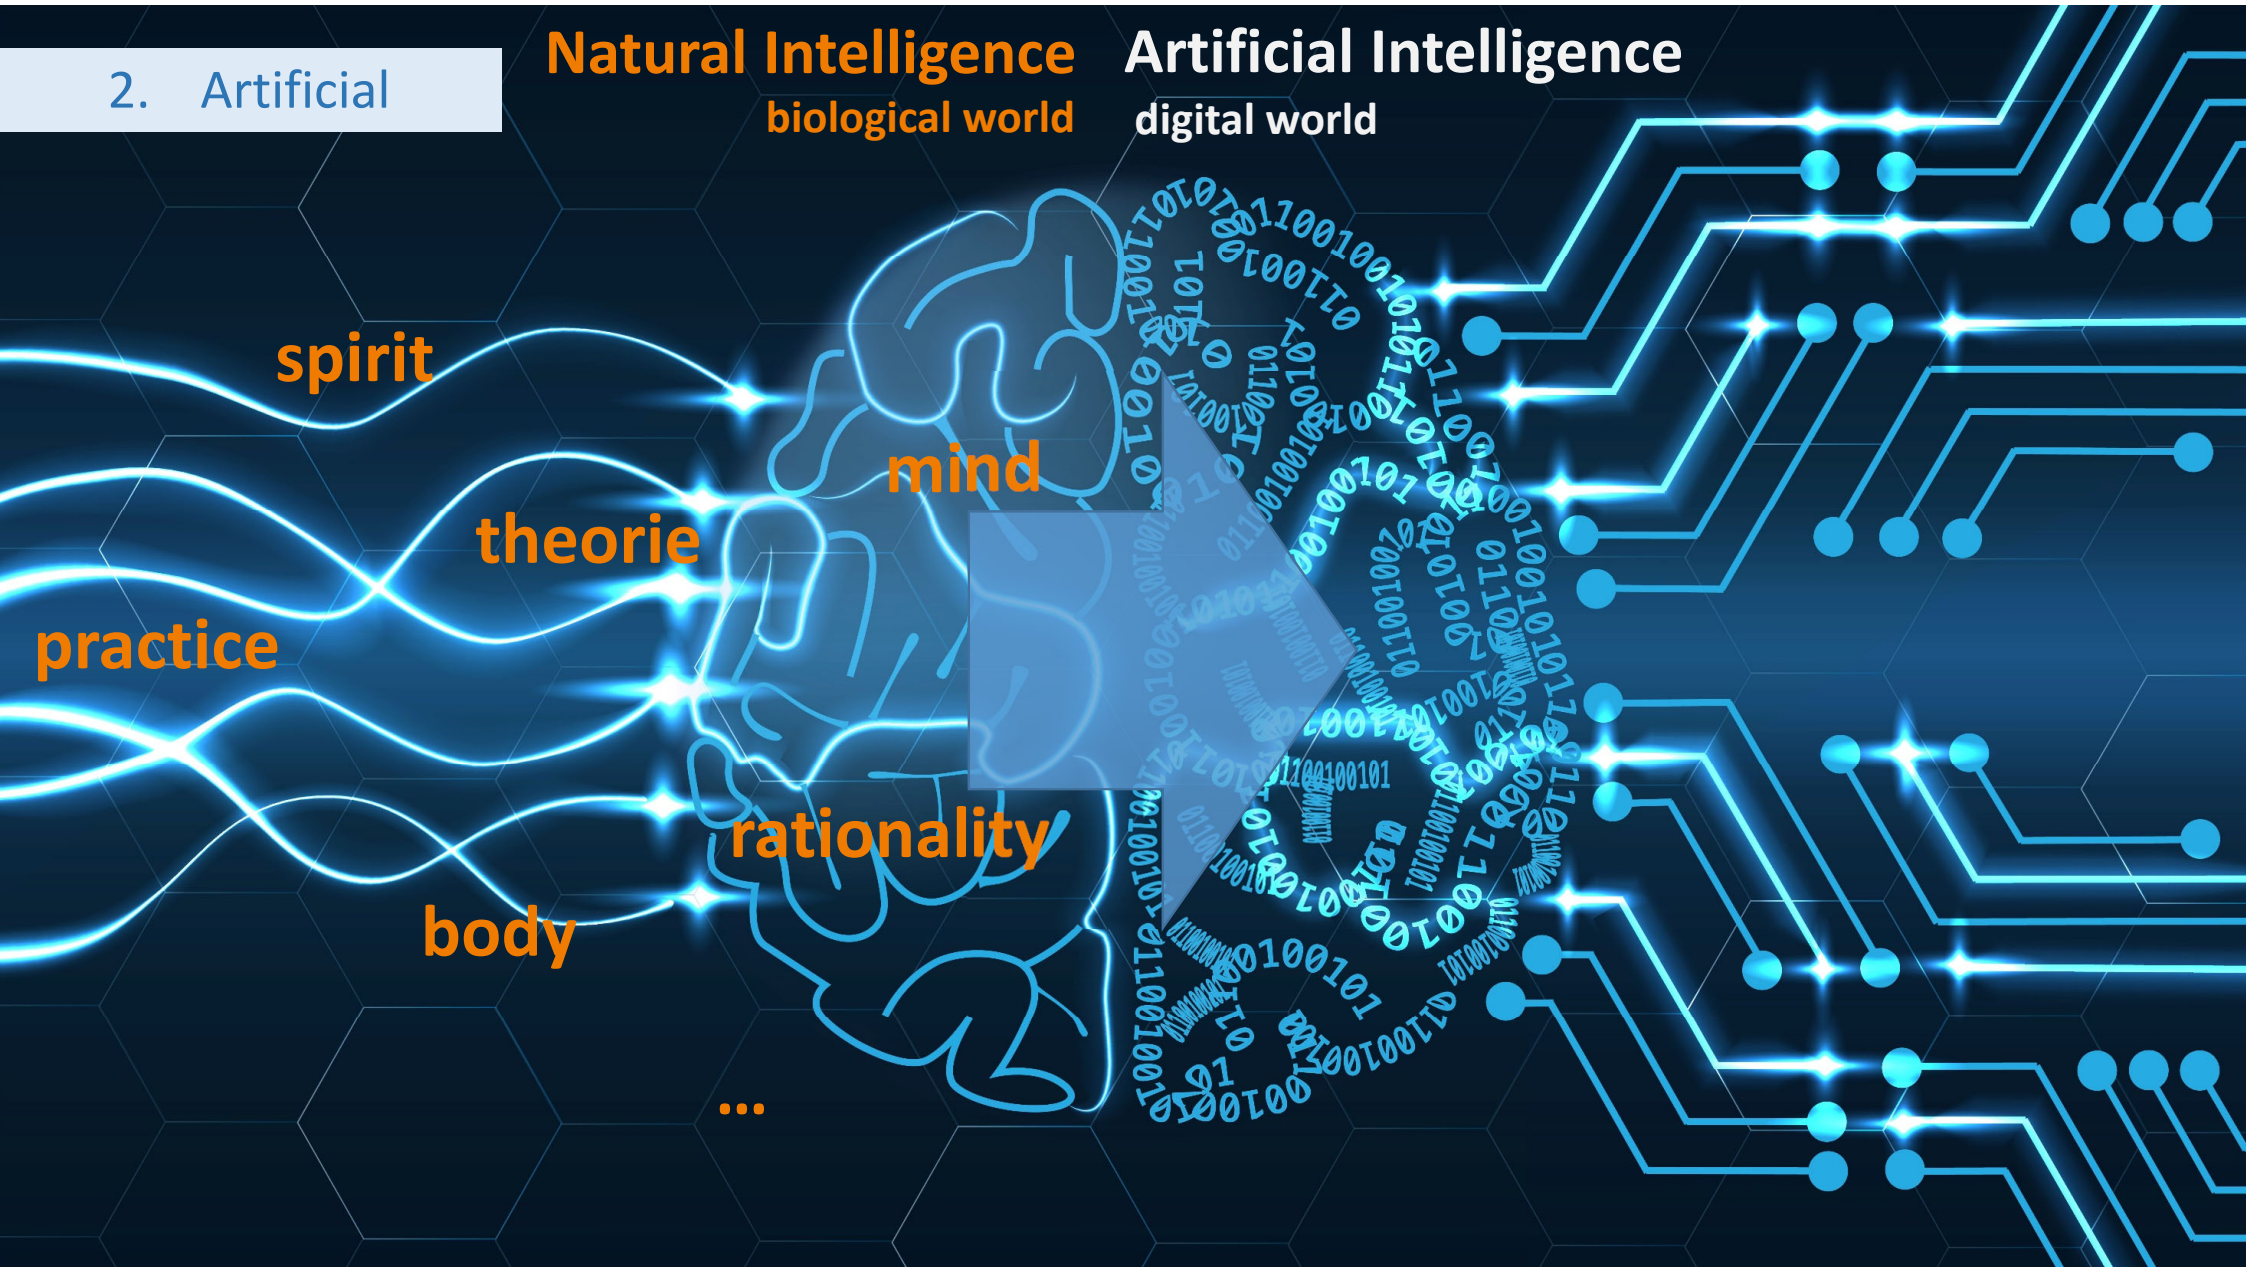

theorie

practice

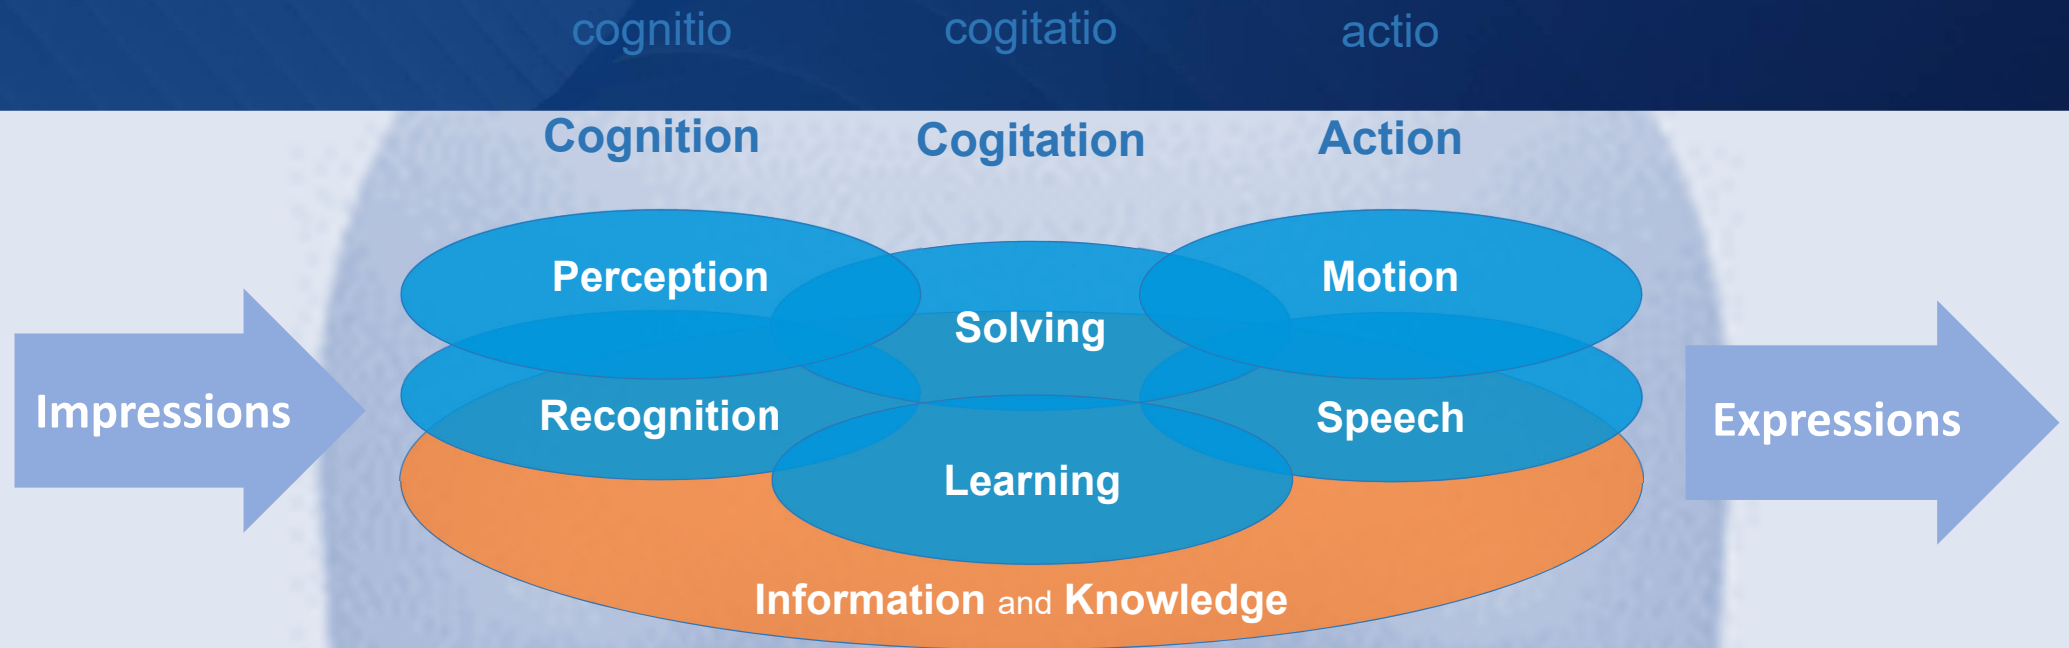

rationality

body

...

3. Interaction

4. Learning

What is Learning?

Gaining Insights and
Knowledge.

Is Machine Learning General
Learning?

No.

How does Learning Work?

By Thinking.

Machine Learning

Basis for AI.

5. Thinking

What is Thinking?

The Base of Intelligence.

How does Thinking Work?

Processing Impressions,
Memories and Experiences.

What is Thinking doing?

Producing Insights and Plans.

Machine Thinking?

**Makes Artificial General
Intelligence Possible!**

5. Thinking

Deep Understandings of Models

Processing of all **impressions** for using them for the planning and execution of goal-oriented **acting** (**expressions**) after the **need for action** was determined.

5. Thinking

What we need to build a thought machine

	Information	Action	Thinking
Theory	+	+	+
Machine	+	+/-	+/-

6. Maturity

Weak
Artificial
Intelligence

PRESENCE

Perception

Recognition

Solving

Learning

Strong

Artificial
Intelligence

FUTURE

Motion

Speech

7. Conclusion

Is Machine Thinking
complex?

Yes. Much more than
Machine Learning.

?

.

Does AGI already exist?

No.

Is AGI Possible?

Yes.

I
Thank
You
